ANGLOLANG

EFFECTIVE USE OF TECHNOLOGY IN TEACHING

FULL DESCRIPTION OF TRAINING CONTENT

This course is for teachers who would like to increase their awareness and usage of technology in a teaching context. Morning sessions focus on language development where participants gain confidence in using English. The afternoon methodology sessions introduce fresh and innovative approaches to using technology in teaching.

PREPARATION

All participants complete an enrolment form with the following information:
- Personal details
- Age of students
- Subject(s) taught
- English language level
- *If you are not a teacher of English then we recommend you take our online placement test (details in your letter of acceptance)

An optional four week e-learning phase precedes the two week course at Anglolang. This focuses on language, culture and activities based around TIT methodology.
Before arriving in Scarborough, participants receive details of their accommodation. If this is a homestay provider, a family description is provided.

OBJECTIVES

By experiencing a range of practical teaching techniques, participants will expand their own working classroom ideas while refreshing and developing their English language proficiency.

By the end of the course participants will have:
- Collected a portfolio of teaching resources & online tools
- Acquired new ideas for motivating their students
- Increased their awareness of how technology can be used in the classroom
- Shared ideas and experiences
- Created a network of teaching contacts within Europe

METHODOLOGY

This course uses a wide variety of communicative activities to develop language competence and will also raise participants' awareness of how technology can be used in the classroom. Participants gain confidence in using technology through practical sessions which equip them with ideas and materials that they can use upon their return to their own country. They will take part in workshops, open discussions and a study visit during term time (e.g. a primary school, a secondary school, an FE college or a training and enterprise organization) , subject to availability or a place of cultural interest (non-term time). The exact content of the course is negotiated before and throughout the course to take into account the specific needs and developing interests of each group.

Participants are grouped according to their English level for morning language development sessions and are encouraged to reflect on how they could adapt the activities demonstrated in lessons for use in their own classrooms. The technology sessions take place in the afternoons.

ANGLOLANG

EFFECTIVE USE OF TECHNOLOGY IN TEACHING SAMPLE TIMETABLE
